

Electronic Locks

Onity provides cost-effective, customizable access management systems with streamlined check-in, enabling guest convenience and operational efficiencies for large or small properties. The new Trillium® lock range combines modern aesthetics, proven reliability and the latest technologies, with an easy upgrade path.

Trillium RFID

ADVANCE Trillium RFID

Trillium Mag

ADVANCE Mag

Onity offers a proven mobile key solution; our lock range is available with an optional DirectKey™ module for a superior guest experience, which can also be updated on premises later when ready to make the leap to mobile access.

Designed to deliver optimal efficiency, flexibility and guest satisfaction, OnPortal™, Onity's full access lock management software is a scalable solution with roving check-in option.

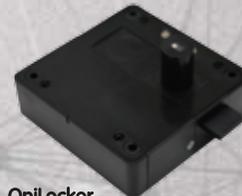

Other Locking Solutions

e-CylinderMAX

Electronic Cylinders

Onity e-Cylinders are the ideal locking solution for small to medium size hotels, providing convenience and high security using RFID MIFARE® technology. They are ideal for refurbishment projects as they only require replacing the mechanical lock for the electronic cylinder, without drilling the door.

OniLocker

RFID Lock for Lockers

Onity also offers electronic locks for lockers, which are operated with contactless RFID MIFARE® carriers. Ensuring functionality and high security, they provide peace of mind for users and management.

OS500

Solution

Intellity

Electronic In-Room Safes

The Onity safe range makes it easy for guests to protect their goods and for staff management, backed by reliable support. Ensuring high security, they include many features and size options to accommodate a variety of sensitive belongings including laptop PCs.

Minibars

The Onity solutions range incorporates **solutiOn**, a series of user-friendly and stylish minibars designed specifically for the hospitality market. Available in various sizes and options, their absorption technology cooling system ensures a totally silent operation.

Energy Management Solutions

Onity energy savers help improve your bottom line generating important savings, maximising energy efficiency and looking after the environment. Intelligent versions can differentiate guest and master cards, acting accordingly depending on the information read from the card.

Our Extensive Experience

Onity, one of the world's leading providers of electronic locking systems, is at the forefront of the evolution in security and access control for the hospitality industry. As a trusted leader in proven, reliable solutions, Onity has set the standard with over 5 million electronic locks sold to more than 30,000 hotels worldwide.

At Onity we build lasting relationships to provide the solutions our customers need, for today and tomorrow. Onity has an extensive network that spans more than 125 countries and agreements with more than 250 hotel chains around the world.

With decades of industry experience, Onity offers reliable quality products backed by superior service and support. Onity is part of UTC Climate, Controls & Security, the world's largest provider of building technologies.
